

### 9.3.1. Example - List of fees and costs

This list is intended to help users of the INREV Fee and Expense Metrics when allocating fees and costs to TGER or REER, but it is not meant to be an exhaustive description of all the possible fees and costs that could be incurred by a real estate vehicle.

If services such as bookkeeping, valuation, property management, tax and financial advice are provided by the manager of the vehicle, the charges relating to these services are allocated on the basis of the nature of the service rendered.

The list below includes only those fees and costs that are charged directly to the vehicle. Hence it does not include fees and costs charged directly to the investors.

Only those fees and costs that are charged to the profit and loss account during the period, in line with the INREV principles, should be considered in the assessment of the TGER and REER. For example, the unamortised portion of vehicle formation costs is not taken into account when determining the TGER for the period.

Property costs are presented net of service charges.

#### List of vehicle fees and costs

FEE AND COST CATEGORY	FEE AND COST ITEM
